

MRA is the world's largest aftermarket screen maker and produce the widest range of the highest quality screens there is, all manufactured in their German TUV-approved facility.

MRA screens are manufactured from a unique and specially developed material - used by no other screen manufacturer - with the following ideal and unique combination of properties.

- ~ Shock resistant and shatterproof - to minimise the chance of breakage from the impact of stone chips etc.
- ~ Rigid - to retain its shape and avoid distortion under extreme wind pressure and high temperatures
- ~ Safer - in extreme circumstances should it break, the resultant edges are not sharp
- ~ Resistant to most chemicals - including Petroleum/Gasoline and Alcohol etc.
- ~ UV (sunlight) resistant - for at least ten years to avoid dulling or clouding

MRA always undertake an intensive development programme with each new bike for which they develop screens, using a variety of different sized riders - and even wind tunnel testing where necessary - to guarantee a real improvement on your bike!

In 1994, MRA introduced the first double bubble racing screen at the IMFA international motorcycle trade fair in Cologne, Germany. The latest generation of MRA RacingScreens includes a revolutionary dome design that is flattened at the top. Instead of creating lift, this new design pushes the front of the bike down onto the road . a more desirable effect when racing!

MRA VarioScreen The two-piece Varioscreen can be adjusted by angle or height and features an internal wind channel to reduce turbulence.

MRA VarioTouringScreen The VarioTouringScreen features a 7-position adjustable spoiler at the top of the wind deflector that can adjust the airflow to suit the rider.

MRA also manufacture screens for unfaired bikes.

### **MRA VARIO SCREEN FOR NAKED BIKES (VNB)**

Supplied with a complete fitting kit for your bike, the Vario Screen is the most effective and protective naked bike windshield. Because of its unique 5cm/2" vertically adjustable two-piece split design - which allows high-pressure air to bleed through the screen to reduce differential buffeting - it offers exceptionally good protection without generating annoying wind noise or turbulence to interfere with the enjoyment of your riding.

### **MRA VARIO TOURING SCREEN FOR NAKED BIKES (VTNB)**

The Vario Touring Screen for Naked Bikes (VTNB) - supplied with a complete fitting kit for your bike - is the result of MRA's experience and continual development aim of producing 'small screen looks with large screen performance'.

Uniting the attractive, appearance of the type of small screen normally found on bikes only ridden at lower maximum speeds - with the wind protection of a far larger screen - VTNB is the perfect way to find the comfort of a faired bike without attaching an oversized screen.
