

Installation

Model specific instructions

For:

- Royal Enfield Continental GT 535
 - 2017 and newer

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed. (The arrow and the red circles)
- The AIT sensor is located in the air tube between the air filter box and the throttle valve housing
- You may be able reach the AIT sensor from the left hand side of the bike (See the arrow in the picture below)
- But access is a lot easier if you lift the rear part of the gas tank.
 - You have several choices for the BoosterPlug sensor location, just stick to the simple rules in the general installation instructions for placing the external sensor, and you'll be fine.
