

Installation

Model specific instructions

For:

- [Ducati Panigale 899 \(All\)](#)
- [Ducati Panigale 959 \(All\)](#)
- [Ducati Panigale 1199 \(All\)](#)
- [Ducati Panigale 1299 \(All\)](#)

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed.
- The AIT sensor is located inside the fairing.
- Route the external sensor to a spot under the heat light and secure it with a zip-tie so it's not flopping around.
