

Installation

Model specific instructions

For:

- **Ducati ST3 + ST3S**

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed.
- On the ST3 Bikes, the AIT sensor is located inside the front fairing., on the left hand side, near the head lights.
- The External sensor on the BoosterPlug is already in the right spot, so just secure it with a zip-tie so it's not flopping around.
