

Installation

Model specific instructions

For:

- [Triumph Speed Triple](#)

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed.
- Remove the seat (Yellow circle - Picture 1)
- Lift the front end of the tank (Yellow circle - Picture 2 +3)
- The red circle will show you the location of the AIT sensor
- Note: The BoosterPlug for the Speed Triple have a longer cable for the AIT connector than shown on our website—this is just to let you relocate the square BoosterPlug box, as there's not much room under the tank.
