## HOW DOES IT WORK?

---

### **MONIMOTO ARMS AUTOMATICALLY**

When the Key Fob leaves your ride (~100 ft), the tracker arms, ready to detect any movement

### **DETECTS MOVEMENT**

The tracker uses LTE-M (LTE Cat-M1), 2G and GPS to track your ride as well as Bluetooth and an Accelerometer technologies

### **ALERTS YOU VIA PHONE**

when suspicious movements are detected

### **SEND YOUR BIKES' LOCATIONS**

Track your bike on the in-app map over 1-5 min. intervals

# THIS GPS TRACKER WILL PROTECT YOUR RIDE FROM THIEVES

## DIY DEVICE

Easy installation. No professional needed. Batteries and eSIM card are included and ready to go

## COMPLETELY WIRELESS

No wires and no complicated installation.

## BATTERY POWERED

Wired anti-theft devices are easy to remove and drain your bike's battery life. Your wireless tracker's batteries will last for up to one year or more

## CALLS YOUR PHONE

Detects a theft attempt and calls your phone - all in 50 seconds or so

## WATER AND DUST RESISTANT

The IP65 rating means your tracker can always keep up with your bike

## DIRECT SUPPORT

All after sales support is done directly through the App. Just download the App and follow the wizard!

# FITS ALL POWERSPORTS. FULLY PORTABLE

- Monimoto is secure. Protects your ride whether you leave it unattended in the city, go off-road, or take it on a longer adventure.
- Transfer your Monimoto from one ride to another whenever you want - it's easy when it's wireless.
- Monimoto is flexible. One smartphone can support multiple trackers and one tracker can pair to up to 3 key fobs.

**2 LITHIUM AA  
1,5V BATTERIES**

### **DATA CONNECTIVITY:**

**2 MONTHS FREE, £36 /YEAR AFTERWARDS**

Pay through the App, by credit card or Paypal.

## WAIT! .. HERE'S WHAT YOU NEED TO KNOW BEFORE WE TAKE YOUR MONEY

1. MONIMOTO has only one purpose: prevent the theft of your property. It cannot be used to log your trips itineraries. Tracking will only begin when it detects a possible theft. You will not be able to use your tracker to locate your ride on demand.
2. After installing the app and pairing your keyfob, you place the tracker inside your vehicle. Be creative! Find a spot that thieves won't look for. Before final installation, always test the device with a theft simulation.
3. 95% of bikes will have plenty of room for Monimoto trackers, but it may be more difficult to find a hiding spot on bare-bones off-roaders and extreme "naked" bikes.
4. MONIMOTO uses GPS signals. For best results, install the tracker correctly and run some tests before your final installation.
5. Remote regions may not have GPS or 2G or LTE Cat-M1 networks, including deserts and mountains

# MONI MOTO

## WORKS INTERNATIONALLY

Monimoto 7 uses brand new LTE-M network as well as 2G network and comes with the embedded eSIM card.
